

## Discrete Applied Mathematics

### Volume 151, Issues 1–3, 1 October 2005

## Special Issue: IWCIA 2003 – Ninth International Workshop on Combinatorial Image Analysis

**Guest Editors:**  
**Vito Di Gesù, Attila Kuba**

## Contents

Dedication	1
<i>V. Di Gesù and A. Kuba</i>	
Preface	3
Guest Editors	4
<i>A. Apostolico and V.E. Brimkov</i>	
Optimal discovery of repetitions in 2D	5
<i>E. Barcucci, A. Frosini and S. Rinaldi</i>	
An algorithm for the reconstruction of discrete sets from two projections in presence of absorption	21
<i>K.J. Batenburg</i>	
An evolutionary algorithm for discrete tomography	36
<i>B.M. Carvalho, G.T. Herman and T.Y. Kong</i>	
Simultaneous fuzzy segmentation of multiple objects	55
<i>D. Coeurjolly, I. Sivignon, F. Dupont, F. Feschet and J.-M. Chassery</i>	
On digital plane preimage structure	78
<i>G. Dahl and T. Flatberg</i>	
Optimization and reconstruction of $h\nu$ -convex (0,1)-matrices	93
<i>A. Daurat and M. Nivat</i>	
Salient and reentrant points of discrete sets	106
<i>I. Debled-Rennesson, J.-L. Rémy and J. Rouyer-Degli</i>	
Linear segmentation of discrete curves into blurred segments	122

<i>F. Feschet and L. Tougne</i> On the min DSS problem of closed discrete curves	138
<i>A. Frosini and G. Simi</i> The reconstruction of a subclass of domino tilings from two projections	154
<i>Y. Gerard, I. Debled-Rennesson and P. Zimmermann</i> An elementary digital plane recognition algorithm	169
<i>H.Y. Liao and G.T. Herman</i> A coordinate ascent approach to tomographic reconstruction of label images from a few projections	184
<i>C. Lohou and G. Bertrand</i> A 3D 6-subiteration curve thinning algorithm based on $P$ -simple points	198
<i>T. Schüle, C. Schnörr, S. Weber and J. Hornegger</i> Discrete tomography by convex-concave regularization and D.C. programming	229
